SEE PROJECTS >

EZEQUIEL GONZALEZ

Full-Stack Software Engineer

Full-Stack Engineer with 14+ years of experience building scalable web applications and user-focused digital products. Specialized in TypeScript, React, Vue and modern frontend architectures, with a strong focus on performance, UX, and clean code. Proven ability to take products from concept to production, collaborating across teams to deliver high-impact solutions.

WORK EXPERIENCE

FRONTEND SOFTWARE ENGINEER - BERLIN, GERMANY

Konvo GmbH [2025- Present]

- Led the frontend rebuild of the platform from scratch using Vue and TypeScript, improving performance, scalability, and overall user experience.
- Delivered a highly complex and business-critical feature in record time, ensuring zero bugs or regressions in production.
- Designed and implemented a company-wide Design System, establishing reusable components and consistent UI standards across the application.

FULL-STACK DEVELOPER - BERLIN, GERMANY

Cileria GmbH [2024- 2025]

- Built and optimized scalable applications using TypeScript, React, and Node.js, improving performance and reducing load times by 25%.
- Created functional, user-friendly website prototypes that optimized design processes.
- Coordinated client requirements, ensuring effective technical solutions and clear communication.

FULL-STACK DEVELOPER - BERLIN, GERMANY

DCI Digital Career Institute GmbH [2023 - 2024]

- Engage students with interactive recap sessions.
- Use multimedia, cases, quizzes for immersive learning.
- Tailor support and empower students to overcome obstacles.

FULL-STACK DEVELOPER & PRODUCT DESIGNER - LATAM

Cripto Ecosystem [2020 - 2023]

- Product design and full development of the platform.
- Sketching, prototyping and conducting the User Research.
- Optimized workflow, cutting turnaround time by 20%.

FRONTEND DEVELOPER - UNITED KINGDOM

Skyscanner [2018 - 2019]

- Optimized front-end performance, reducing load times by 30% through efficient code and resource management.
- Collaborated closely with design and backend teams to ensure seamless UI integration and functionality.
